

JOHN WILKES, Esq.

[Engraved for *Weatherwift's Almanack*, 1769.]

Hail WILKES, immortal in the List of Fame,
Thy hateful Foes shall hide their Heads in Shame,
When you the Sweets of Liberty restore
To Britain's Isle, and who can wish for more?

A N E C D O T E S of Mr. W I L K E S.

“**A**S we have given our readers a portrait of Mr. Wilkes, it will be expected we should accompany it with some anecdotes of that extraordinary personage, which we shall do as briefly as possible.

“**JOHN WILKES**, Esq; late member in Parliament for Aylesbury, in Buckinghamshire, the reputed author of the North-Briton, No. 45; published on Saturday, April 23, 1763, was taken into custody on the 30th of that month, and all his papers seized, by a warrant under the hand and seal of the Earl of Halifax, one of the Secretaries of State, directed to four of his Majesty's messengers; hereupon a motion being made in the Court of Common-Pleas, then sitting in Westminster-Hall, for that purpose, an *habeas corpus* was granted, but could not be sued out till four in the afternoon of May 1, and, though it was known such a writ was granted, Mr. Wilkes was sent to the Tower, without being permitted to see any of his friends that might attend upon him there, who were several times repulsed in their applications. On May 3, in the morning, upon a second *habeas corpus*, the return of the first being insufficient, Mr. Wilkes was brought up to the Court of Common-Pleas, where he made a spirited and sensible speech, setting forth the hardships he had suffered, and the case being learnedly argued by eminent serjeants at law, both on the side of the crown and the prisoner, the court took till Friday, May 6, to consider the case, and give their opinion, remanding Mr. Wilkes, mean time, to the Tower. On the last mentioned day he was again brought up to the court, which he addressed in a second speech, in which he observed, that “the liberty of all peers and gentlemen, and what touched him more sensibly, that of all the middling and inferior class of people, who stand most in need of protection, was, in his case, to be that day finally decided upon: A question of such importance, as to determine at once, whether English liberty be a reality or a shadow.” Then the Lord Chief Justice, Sir Charles Pratt (the present Lord Chancellor) stated the matter in question, and pronounced Mr. Wilkes's commitment was not legal; but that his privilege of a member of Parliament was not destroyed, as he was not charged with treason, felony, or breach of the peace; therefore the court ordered him to be discharged, on account of his privilege: Hereupon Mr. Wilkes again addressed the court, returned his thanks for their upright decision, and was attended to his house, in Great George-street, by an infinite multitude

itude of people, with universal acclamations. He, that very night, wrote to the Secretaries of State, demanding his *stolen goods*, which he said he was informed were in their Lordships possession, and next morning applied for a warrant to search their houses, which was refused him. Receiving an answer from the Secretaries of State, which was not satisfactory, he made a bold and stinging reply. Whilst he was in the Tower, on May 4, he was dismissed from his post of Colonel of the Buckinghamshire militia, and before the end of the term an information was filed in the Court of King's Bench, at the King's suit, against him, as author of the aforesaid North-Briton, No. 45. We must now observe, that at the meeting of the Parliament, the paper intituled the North-Briton, No. 45, was resolved to be a false, scandalous and seditious libel, &c. and it was ordered to be burnt by the hands of the common hang-man:—Notwithstanding which, Mr. Wilkes complained to the house of a breach of the privilege of that house, by the imprisonment of his person, the plundering of his house, the seizing of his papers, and the serving him with a subpcena, upon an information in the Court of King's Bench; but the house resolved, “that privilege of Parliament does not extend to the case of writing and publishing seditious libels, nor ought to be allowed to obstruct the ordinary course of the laws, in the speedy and effectual prosecution of so heinous and dangerous an offence:” Mean time, on Nov. 16, Mr. Wilkes was wounded in a duel by Mr. Martin, whereupon his physicians attending the house, and certifying his then languishing state, the order for his attending the house was put off to Dec. 16, and, upon further representations, to the 19th of January, 1764, before which time Mr. Wilkes had retired into France, and on the said day he was expelled the house, and a new writ ordered for the election of a member for Aylesbury, in his room. On Feb. 19, 1764, he was found guilty, at the Court of King's Bench, for the re-publication of the North-Briton, No. 45, with notes, and for printing and publishing the *Essay on Woman*; but had obtained before, viz. on Dec. 6, 1763, a verdict against Mr. Wood, late Under-Secretary of State, with 1000 l. damages, for seizing his papers, &c. when the Lord Chief Justice gave his opinion that *general warrants* were illegal. Mr. Wilkes also brought actions against Lord H—, the surviving Secretary of State, but being *outlawed*, about the close of the year 1764, that noble Lord made use of the plea of his being an outlaw, to stop proceedings. Under this state of outlawry, Mr. Wilkes has resided in France, and other countries, an exile from his native skies, supported,

It is said, by the contributions of his friends in England, dividing his time between study and pleasure, which, the remembrance of his many perils from m——l revenge, desperation of a Forbes, the lunacy of a Dun, and the wounds of ——, had not the power to destroy his relish for: Two or three times he is said, upon delusive hopes of pardon, to have visited London, and at length has had the boldness, though still an outlaw, to put up as a candidate at the general election for the city of London, the fate of which is well known; and for the county of Middlesex, for which he was elected by a great majority. Whatever his fate may be, and however severely his enemies may arraign his private failings, it will never, can never be denied, that his steady opposition to illegal general warrants, has been, and ever will be, of lasting benefit to the subjects of Great-Britain; that, if he is not virtuous, he is a lover of virtue; and a friend to the civil and religious liberties of mankind; which we have no doubt of his displaying upon all future occasions, if he should sit in the House of Commons."

STAGE-COACHES and PASSAGE-BOATS, &c.

THE Providence Coaches, kept by Mr. Thomas Sabin, and Knight Dexter, Esq; go twice a Week from Providence to Boston, performing their respective Stages in a Day.

The Norwich Coach comes once a Week from Mr. Azariah Lathrop's, in Norwich, to Dr. Samuel Carew's, on the West Side of the Great Bridge, in Providence, where Travellers will meet with the best Entertainment.—The Stage performed in a Day.

The Providence Passage-Boats, kept by Mr. Joshua Hacker, and Messieurs Thomas and Benjamin Lindsey, ply every Day from Providence to Newport, and perform the Passage, Wind and Weather permitting, in three Hours.

Mr. Peter Mumford, Post-Rider, leaves Newport, with the Western and Southern Mails, on Friday Morning, arrives at Providence the same Night, sets out for Boston on Saturday Morning, which he reaches at Night, and returns with the Boston Mail on Monday, performing his Stage once a Week.

THE
NEW-ENGLAND
Town and Country
ALMANACK,

CONTAINING AN
EPHEMERIS,

WITH THE
True PLACES of the PLANETS;
Rising and Setting
Of the SUN and MOON;
AND

ASPECTS of the PLANETS,
FOR THE

YEAR of our LORD 1769,
Being the First after *Bissextile*, or *Leap-Year*.

CONTAINING ALSO,

The Lunations, Conjunctions, Eclipses of the Luminaries,
Judgment of the Weather, Rising and Setting of the
Planets, Time of High Water at *Providence*, Courts in
the *New-England* Governments, together with useful and
entertaining Essays, chronological Observations, &c. &c.

Fitted to the Latitude of *PROVIDENCE*, in *New-England*;
but may, without sensible Error, serve all the NORTHERN
COLONIES.

By ABRAHAM WEATHERWISE, *Gent.*

PROVIDENCE: Printed and Sold, Wholesale and
Retail, by SARAH GODDARD, and JOHN CARTER,
at *Shakspear's Head*.

COURTEOUS READER,

HAVING for a Number of Years been applied to from several Governments on the Continent for my Calculations, as likewise from most of the West-India Islands, where they have been always well received, and in some Places met with extraordinary Success, I am thereby induced to publish an ALMANACK in this Colony, for the Inhabitants of which I entertain the most profound Veneration.

From my early Youth, the noble and sublime Science of ASTRONOMY has been my principal Study, in the Pursuit of which I have had Advantages that few of my Brother Philomaths, in this Quarter of the Globe, can boast of, having been conversant with the most eminent ASTRONOMERS in Europe and America, some of whom now honour me with their Correspondence.

I may now be said to have passed my Grand Climacteric, yet in this Period of Life, when the Genius of a studious Man is generally somewhat flatted, the beautiful Vicissitude of Seasons, which seems to have given Occasion to the first Institution of the Year, has not lost its accustomed Influence on me, but urges a more vigorous Exertion of my Abilities.

I shall therefore continue the Publication of this ALMANACK annually, and am persuaded that these my Peepings into Futurity will be found worthy the Acceptance of the Public, and meet with a Reception answerable to my Hopes, and the Printers Expectations.

After presenting the Reader with my best Wishes, and assuring him that the following Calculations are made with all Accuracy, I shall conclude with observing, that my ALMANACK being printed on Paper manufactured in this Colony (on the Importation of which from Europe a heavy Duty is drawn out of America) those who may be kindly pleased to promote and encourage its Sale, in Preference to others, published out of the Government, and done on Paper of the Manufacture of Europe, will do a singular Service to their Country, by keeping among us, in these Times of Distress, large Sums of Money, which will otherwise be sent abroad for this Article.

I am the Public's obedient and devoted Servant,

ABRAHAM WEATHERWISE.

Mon. FEBRUARY, hath 28 Days. 1769.

Myriads made happy, *Public Spirit* blefs,
 Parent of Trade, Wealth, Liberty and Peace.
 Unlike where Tyranny the Rod maintains
 O'er turfless, leafless, and uncultur'd Plains,
 Here Herbs of Food and Phyfic, Plenty showers,
 Gives Fruits to blush, and colours various Flowers.
 Where Sands or stony Wilds once starv'd the Year,
 Laughs the green Lawn, and nods the golden Ear. White

III Mon. MARCH, hath 31 Days. 1769.

White shine the fleecy Race, which Fate shall doom
 The Feast of Life, the Treasure of the Loom.
 What tho' no Arch of Triumph is assign'd
 To laurel'd Pride, whose Sword has thinn'd Mankind ;
 Tho' no vast Wall extends from Coast to Coast,
 No Pyramid aspires, sublimely lost.
 Lo! stately Streets, lo! ample Squares invite
 The salutary Gale that breathes Delight.

IV Mon. APRIL, hath 30 Days. 1769.

Lo! Structures mark the hospitable Strand,
 Where *Charity* extends her tender Hand:
 Where the sick Stranger joys to find a Home;
 Where casual Ill, maim'd Labour, freely comes;
 Those worn with Age, Infirmary or Care;
 Find Rest, Relief, and Health returning fair.
 There too the Walls of rising Schools ascend,
 For PUBLIC SPIRIT still is *Learning's* Friend, Where

V Mon. M A Y, hath 31 Days. 1769.

Where Science, Virtue, Town with liberal Hands

In future Patriots shall inspire the Land.

And when too populous at length confess'd,
From confluent Strangers refug'd and redress'd:

When War so long with-draws his barb'rous Trains

That Peace o'rstocks us with the Sons of Men:

So long Health breathes thro' the pure ambient Air,

That Want must prey on those Disease would spare; Then

VI Mon. J U N E, hath 30 Days, 1769.

Then will be all the gen'rous Goddess' leech,
 Then most diffus'd she shines, and most benign,
 Her Eye far piercing, round extends its Beams,
 To *Erie's* Banks, or smooth *Ohio's* Streams,
 It fixes where kind Rays till then have smil'd,
 (Vain Smile!) on some luxuriant houseless Wild;
 How many Sons of Want might here enjoy
 What Nature gives for Age but to destroy?

VII Mon. J U L Y, hath 31 Days. 1769

• Blush, blush, O *Sun* (she cries) here vainly round
 • To rise, to set, to roll the Seasons round!
 • Shall Heav'n distil in Dews, descend in Rain,
 • From Earth gush Fountains, Rivers flow in vain?
 • There shall the *watry Lives* in Myriads stray,
 • And be, to be alone, each other's Prey?
 • Unsought shall here the teeming Quarries own
 • The various Species of mechanic Stone?

9. Mon. OCTOBER, hath 31 Days. - 1769.

And trample what mild Suns benignly raise,
 While Man must lose the Use, and Heav'n the Praise?
 Shall it then be? (Indignant here she rose,
 Indignant, yet humane her Bosom glows)
 No! by each honour'd Grecian, Roman Name,
 By Men for Virtue deified by Fame,
 Who peopled Lands, who modell'd infant State,
 And then bid Empire be maturely great, ' By

• Or as with Good and Ill, in chequer'd Strife.
 • Various the Goddesses colours human Life;
 • So in this fertile Clime if yet are seen
 • Moors, Marshes, Cliffs, by Turns to intervene,
 • Where Cliffs, Moors, Marshes, desolate the View,
 • Where haunts the Bittern, and where screams the Mew
 • Where prowls the Wolf, where roll'd the Serpent lies,
 • Shall solemn Fanes, and Halls of Justice rise.
 • And Towns shall open (all of Structure fair!)
 • To bright'ning Prospect, and to purest Air.
 • Frequented Ports and Vineyards green succeed,
 • And Flocks increasing whiten all the Mead,
 • On Science Science, Arts on Arts refine;
 • On these from high all Heav'n shall smiling shine,
 • And *Public Spirit* here a People show,
 • Free, num'rous, pleas'd, and busy all below.
 • Learn, future Natives of this promis'd Land,
 • What your Forefathers ow'd my saving Hand!
 • Learn when *Despair* such sudden Bliss shall see,
 • Such Bliss must shine from *Providence* thro' me!
 • Do you the neighb'ring blameless *Indian* aid,
 • Culture what he neglects, not his invade;
 • Dare not, oh dare not, with ambitious View,
 • Force or demand Subjection never due;
 • Let by my specious Name no *Tyrants* rise,
 • And cry, while they enslave, they civilize!
 • Know, *LIBERTY* and I are still the *same*,
 • Congenial! — ever mingling Flame with Flame!
 • Nor let me *Afric's* sable Children see
 • Vended for Slaves, tho' form'd by Nature free;
 • If these you dare, albeit unjust Success
 • Empow'rs you now unpunish'd to oppress,
 • Revolving Empire you and yours may doom,
 • (*Rome* all subdu'd, yet *Vandals* vanquish'd *Rome*)
 • Yes, Empire may revolve, give them the Day,
 • And Yoke may Yoke, and Blood may Blood repay.
 Thus (Ah! how far unequal'd by my Lays,
 Unskill'd the Heart to melt, or Mind to raise)
 Sublime, benevolent, deep, sweetly clear,
 Worthy a *Thompson's* Muse, an —'s, Ear,
 Thus spoke the Goddess. Thus I faintly tell
 In what lov'd Works Heav'n gives her to excel.

But who her Sons, that to her Int'rest true,
Still plain with Wisdom, and with Zeal pursue?
These found most frequent in Life's *middle* State,
Rich without Gold; and without Titles great;
Knowledge of Books and Men exalts their Thought,
In Wit accomplish'd, tho' in Wiles untaught,
Careless of Whispers meant to wound their Name,
Nor sneer'd nor brib'd from Virtue into Shame;
In Letters elegant, in Honour bright,
Form'd to give Happiness, their sole Delight.

When Gifts like these conferr'd by bounteous Heav'n,
Talents and Will to the same Person giv'n,
The Man ennobled doth an HERO rise,
Fame and his Virtues lift him to the Skies.
While we admiré what we can't imitate,
Deny'd by Nature, and forbid by Fate.
O! were I form'd to share this heav'nly Fire,
In Parts and Powers strong as in Desire,
Moses, Lycurgus, Numa I revere,
Their Wisdom great, their Love to Man sincere,
By *Public Spirit* rank'd the first in Place;
Envy should fail, and hide her hated Face.

ECLIPSES for the Year 1769.

FOUR Eclipses of the Luminaries will happen this Year,
viz. two of the Sun, and two of the Moon.

The first will be of the Sun, on Sunday Morning, the Fourth of June, beginning at 43 Minutes after Three o'Clock in the Morning. This Eclipse will be visible in London, and the latter Part may be seen here, if the Horizon be very clear; a small Eclipse on his lower Limb or Edge.

The second is of the Moon, in the Morning of the 19th of June, visible, beginning at 45 Minutes after Two o'Clock; the greatest Darkeness will be at 24 Minutes after Four o'Clock, when the Moon will be eclipsed $10\frac{1}{2}$ Digits; the End of the Eclipse will be at Three Minutes after Six o'Clock, when the Moon will be set; the whole Duration, visible on the Earth, will be 3 Hours, and 18 Minutes.

The third is an Eclipse of the Sun, the Twenty-eighth Day of November, beginning at 44 Minutes after Two o'Clock in the Morning, therefore invisible.

The fourth and last is an Eclipse of the Moon, on the Twelfth Day of December, in the Evening; the Beginning will be at

51 Minutes after Ten o'Clock; the Middle, or greatest Darkness, will be at 14 Minutes after Twelve o'Clock in the Morning of the 13th Day, and the End of the Eclipse will be at 37 Minutes after One o'Clock; the greatest Obscuration will be $8\frac{4}{10}$ Digits.

This Year likewise, on the Third Day of June, in the Afternoon, there will be a TRANSIT of VENUS over the Sun's Body, invisible to Britain or America. No more will happen for One Hundred and Five Years to come.

WEATHERWISE.

The following Places, &c. bear from the Rhode-Island Light-House, which stands on the Beaver-Tail, and may be very serviceable to Navigators, more particularly to those unacquainted with our Coast.

THE Eastermost Part of Block-Island, S. S. W. $\frac{1}{2}$ W.
North-West Part of Block-Island, S. W. B. S. $\frac{1}{2}$ W.
Point-Judith, S. W. B. S. $\frac{3}{4}$ W.

South End of Whale-Rock, W. B. S.

North End of Whale-Rock, W. B. S. $\frac{1}{4}$ W.

West Part of Dutch-Island, N. 2 Degrees E.

Kettle-Bottom Rock, N. E. $\frac{1}{2}$ E.

Eastermost Dumplin, N. E. B. E.

Fort George, N. E. B. E.

West Part of Brinton's Point, N. E. B. E. $\frac{1}{2}$ E.

Anchoring Place off Dyer's House, N. E. B. E.

Watch-House on Castle-Hill, E. N. E. $\frac{1}{4}$ E.

Southermost Part of R. Island, adjoining Brinton's Reef, E. $\frac{3}{4}$ S.

The Seal-Rock that appears above Water, at a small Distance

Eastward of Brinton's Reef, E. B. S.

Most Southerly Part of Brinton's Reef, E. S. E. $\frac{1}{4}$ E.

N. B. The above Bearings were taken by a common Meridian Compass, without any Allowance for Variation.

For NEW-LONDON.

WITH a free Wind bring New-London Light-House to bear N. or N. B. E. you are then in Channel Way.

In turning in, you may run Eastward till the Light-House bears N. N. W. but no further; and standing Westward, you may bring it to bear N. N. E.

The above Bearings will clear you of Meschantic Reef, and what is called the Black Ledge, between which is the Ship Channel.

An extraordinary and surprizing Cure for a CANCER, communicated by a Lady, whose Veracity may be depended on, to the Authors of the London Magazine. November, 1767.

A Poor distressed Woman, near Hungerford, had laboured many Years under a most inveterate Cancer in her Breast. A Gentleman in that Neighbourhood told her, if she would use Toads as directed, they would cure her. Agreeable to his Order, she applied eight Toads, tied up in Muffin Bags, to eight Holes in her Breast, which sucked amazingly.—The Toads fastened eagerly, like Leeches.—When they had sucked themselves full, they dropped off in Agonies, terrible to behold. I do not hear they gave any Pain, but, on the contrary, her Pains abated from the first Application. She repeated this till she had demolished 20 Toads, by which Time the Wounds were healed, and her Breast was of the usual size. She has been well ever since.

“The Toads were applied every Night. The better she grew, the longer they lived, and the longer they sucked. The Woman, full of Gratitude, went to a poor Man at Lambourne, in Wiltshire, who had long gone double with a Cancer in his Back, One Mr. H——y was there last Week, and says the Man is absolutely cured. During the Woman’s Attendance on him, she was sent for to a Physician’s Wife at Calne, in the same County; but, to her Honour, she would not leave the poor Man till he was quite cured.—She is now with the Physician’s Wife. I saw two Letters, with every minute Circumstance, wrote by Dr. B’s Lady, who is at Mrs. ——’s, near Hungerford, and not far from the poor Woman’s Parish. This Lady constantly attended her till the Cure was completed.” X. Z.

A Receipt for HEALTH.

HEAR now a rhyming Quack, who spurns your Wealth,
And gratis gives a sure Receipt for Health.
No more then idly roam o’er Sea and Land,
When lo! a sov’reign Remedy’s at Hand;
’Tis *Temperance*;—trite Stuff! ’Tis *Fasting*, then,
Heav’n’s Antidote against the Sins of Men.
Foul *Luxury*’s the Cause of all your Pain;
To scour th’obstructed Glands, *Abstain! Abstain!*
Fast and take Rest, ye Candidates for Sleep,
Who, from high Food, tormenting Vigils keep—
Fast and be fat, thou Starveling in a Gown,
Ye Bloated *fast*, I’ll warr’nt it brings you down:

Ye Nymphs, that pine o'er Chocolate and Rolls,
Hence take fresh Bloom, fresh Vigour to your Souls.
Fast and fear not—you'll need no Drop nor Pill;
Hunger may starve, Excess is sure to kill.

*The following Prescriptions in FARRIERY have been
tried with great Success.*

A Receipt to cure Horses of the BOTTS.

TAKE eight Leaves of Tobacco, infuse them all Night
in Rum and Water, of each a Gill, in the Morning
squeeze them out, and add to it a Gill of Melasses. It is an
excellent Drench for the Botts.

For a foundered Horse.

IF a Horse is so foundered that he scarce can walk, clean the
under Side of his Hoofs, pour boiling Pitch or Tar in them,
and tie them up with Horse-dung; he will be able in the Morn-
ing to go on his Journey.

Receipt to cure a Horse of a COUGH.

TAKE a Quart of Ale, or strong Beer, warm it, and put
to it a Quarter of a Pound of common Treacle, or Me-
lasses, and a Quarter of a Pint of double distilled Anniseed Wa-
ter; stir it well together, and give it to the Horse, with a Horn,
at Night, after his ordinary Food; the next Morning give him
a Pail of warm Water, with a Handful of Oatmeal in it, and a
Mash of Malt or Bran, with a Handful of Beans, and let this be
repeated till the Horse is well.

The same Receipt will cure a Cow, or an Ox, and prevent
the Fever, and what is commonly called the Distemper among
horned Cattle, only add one Ounce of Fennel or Carraway
Seeds, bruised.

Great Numbers of Cattle having died in New-England last
Year, through a Scarcity of Fodder, the following may tend,
in some Measure, to prevent the like Calamity in future.

Of the Benefit of sowing Carrots, for the Winter Food of Cattle.

BY a small Pamphlet published by a Farmer in England,
under the Direction of the Society for the Encouragement
of Arts, it appears that vast Advantage may be made from sow-
ing Carrots, for the Winter Food of Cattle. On 30 Acres and
an Half, by Mensuration, he had 510 Loads of Carrots, equal
in Use and Effect to near 1000 Loads of Turnips, or 300 Loads
of Hay, besides five or six Loads which the poor People took
from

om him. He began to draw his Carrots about the Middle of October; he gave them to his Cattle at first with Cabbages, which they naturally eat as readily as Turnips; but in a short time the Cattle of every Sort preferred the Carrots. He computes that the Profits of these Carrots, from the 30 Acres and a half, in fattening his Cattle, was 108 l. Sterl. He afterwards, in April, turned in his Dairy and Flock of Sheep on the Land where the Carrots had been sown, after plowing them up with a narrow-sharred Wheel-Plow. The Cows, upon feeding on them, gave more Milk than usual, and continued it longer; and both Sheep and Lambs did much better than he ever remembered them to have done at that Season of the Year. He likewise fed sixteen Horses, which did all his farming Work, with the Carrots, for Twenty-eight Weeks, giving them neither Hay nor Corn. So that he reckons the whole Profit of the Carrots to him to be no less than 163 l. He chops off the Heads and Tails of the Carrots, which he gives his Horses, and sometimes gives them another Cut.

The Finlanders Method of reviving Persons or Animals, after they have been drowned many Hours, and sometimes several Days, which may, it is hoped, prove a Means, under the Favour of Heaven, of restoring many to their Friends, their Families and Country, who otherwise would have been lost beyond Remedy.

THE whole Art consists in the Manner of drawing them out of the Water, and is performed as follows; as soon as they have found the drowned Person, they draw him up very gently towards the Surface of the Water, yet without bringing him hastily into the Air, to the End that the raw and gross Air may not rush impetuously into him, and mingle with the Water that is yet in the Lungs; and lest, when the Circulation of the Blood comes to be made again, the Blood does not burst the pulmonary Veins, and so, by the Crudity of the Water, the vital Warmth of the Heart be not extinguished: Whence it is observed in almost all drowned Persons, that are not drawn up with that Care, that the Blood issues out of their Mouths; and when that happens, there is not any Hope left of Recovery. Wherefore the Finlanders, having found the drowned Body, draw him gently towards the Surface of the Water, and presently cover him with a thick Cover, and carry him into a hot Stove-Room (any close Fire-Room may do) where they put him upon a Cask, and roll him to and fro, with a very gentle Motion at first, increasing the

the Agitation by Degrees, whereby the Water comes out of the Mouth, Nose, and other Orifices. And the Water being come away, and the Pores opened, they rub the Body with hot Linen Cloths, and use other Fomentations, and then he begins to live again by little and little; and after some Days (some sooner, some later, according to their Constitution) they are revived.

The Probability of Success in reviving Persons that have been drowned for so long a Time, by this or any other Method, is ascribed by Dr. Hierne (from whose Letter to the Royal Society at London the above Account is extracted) to the drowned Persons not being totally deprived of Air; and therefore, though the Lungs, by Reason of the Abundance of Water got in, cannot perform their Function, yet since the Water cannot enter into the Heart, nor the Arteries and Veins, the Circulation of the Blood is not quite stopped, but only hindered; so that it cannot be made but very slowly and insensibly. If the Passage of the Nourishment is obstructed, and the Chyle cannot pass, it is to be considered, that the vital Heat is also very weak in this Case, and consequently, that the Consumption of the Blood, Spirits and Nutriment, is but small, and in a Manner the same as it is in the Bears of Lapland and Finland, which sleep whole Months without eating any thing.

N. B. It is presumed that the Success of the above Method might be rendered more speedy and compleat, by blowing strongly in the Mouths of the drowned Persons, and distending their Chests, and then laying the naked Body in dry Ashes or Salt, after having first practised the Precautions above related.
